

Dear Louise,

I thought that you and the participants in IP might be interested in a new article of mine entitled "Quantum Gravity and Taoist Cosmology." The work is published in a special issue of the journal *Progress in Biophysics and Molecular Biology*. Here is a [link](#) to the essay. The publisher has also provided a link to the entire special issue, available to be read at no cost until June 20, 2018: <http://www.sciencedirect.com/science/journal/00796107/131>

Very best wishes for a joyful holiday and a productive new year!

Steve Rosen
