The Psychological Power of Language

Sayyed Mohsen Fatemi, Harvard University, USA

This book is on the psychology and power of language in creating realities. It presents both the theoretical and practical implications of the psychological power of language in various domains of our life including interpersonal, interpersonal, and educational realms of our beings. Human life is ineluctably tied to the power of language – it can mindlessly or mindfully paralyze (disempower) or empower choices as it can marginalize and silence our narratives. The book demonstrates how a mindful choice of language would give rise to novel possibilities of togetherness, wholeness, and health.
